

Reform your document management

The MPS Team
From solutions to software

A consultative approach to MPS, where we work with you to create a bespoke solution seamlessly designed around your infrastructure, providing efficiencies, detailed reporting and cost savings.

The MPS Team are experts in creating tailored managed print solutions which integrate securely into our customers' case or document management systems. We draw upon a carefully selected pool of trusted partners to provide you the best hardware and software combination for your workplace, that can be built on any platform and communicate with different operating systems, creating your own document and print management ecosystem, all fronted by accessible, user-friendly technology.

As your MPS provider, we are absolutely committed to taking care of everything. The equipment, the supplies, the service and the management of your printer fleet. Everything.

Our legal expertise sits across all departments, from the mail room to the admin team. Our methodology works to:

- Assess your firm's requirements and optimise your asset usage.
- We secure endpoints and integrate with your IT framework and case or document management system.
- Your workflows and processes are automated and documents digitised, boosting productivity.
- Your infrastructure is then continually reviewed, with a thorough account management service providing proactive problem solving and in-depth performance metrics for increased ROI.

Strengthen your service offering by guaranteeing the best-in-class security for your clients.

Your clients demand the best protection for their sensitive data, especially when print related data breaches can be frequent and costly. Did you know 11% of all security incidents are print related, equating to an average of nine print-related incidents per year with 59% of these leading to data losses, costing an average of £313,000 per-annum to deal with?*

Your bespoke solution guarantees strict, regulatory compliance and that security is a top priority when documents are handled, stored and shared. We'll provide exactly the levels of security that you need, with solutions ranging from controlling access to each device right through to a fully secure document infrastructure, complete with a detailed audit trail.

The MPS Team's Legal Solution ensures that both your firm and your clients are GDPR compliant, end to end, from inbound client letters to outbound forms.

Our innovative software stores all documents to your case or document management system without human error and in a GDPR compliant way, helping you to avoid mistakes in keyed data.

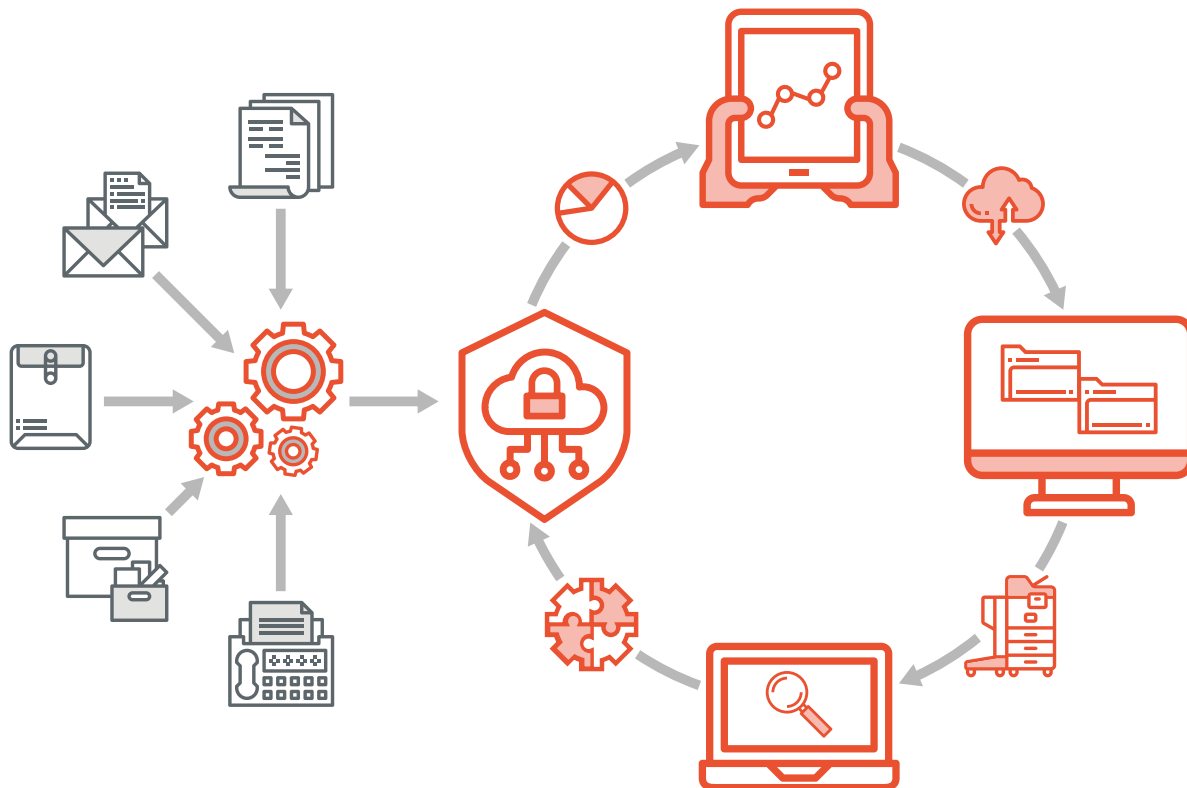

Documents are transformed from physical to digital and become searchable and findable- that's all documents, in any format: including shared folders, SMS, email, fax and paper. Data duplication becomes a thing of the past, and the need for physical storage is reduced, saving you costly off-site storage fees.

64% of IT departments can't track their usage and print costs.*

Digitally transforming your workplace will result in lighter paper and consumable usage, a reduction in storage space, and a smaller carbon footprint. For your essential printing, we'll help you take back control with high levels of performance metrics, consolidated fleet reporting and accounting integration.

Your very own supplies, maintenance and information management strategy will minimise costs, maximise productivity, increase security, benefit the environment and your CSR.

With a variety of competitive financial pricing models, we'll do all this in line with your budget.

Providing unrivalled integration, productivity and security

The MPS Team is a leading MPS provider in the UK, a Canon Silver Partner, a HP Amplify Power Services Partner and one of only a select few Xerox Platinum Partners.
