

The workplace has changed

The MPS Team
From solutions to software

COVID-19, fast-tracking digital transformation

The new normal

COVID-19 is accelerating the adoption of digital collaboration, as working at home becomes the 'new normal' and we also see an unfamiliar office environment emerging.

The value of digital technology, software, and solutions are obvious to companies everywhere right now and organisations need to build operational resilience to survive this new reality. Those enterprises able to use technology to rethink their business model, by fast-tracking digital transformation, will be the ones ahead of their competition.

Does this sound familiar?

Question...

- Does your dispersed workforce require more efficient technology and digital processes?
- Do you require workflow automation for manually handled processes, improving productivity, efficiency, and customer experience?
- Are you a paper-heavy organisation that needs to access and share archives and folders, securely and remotely?
- Do your employees need to combine, edit, and scan paper to PDF and create searchable PDF files?
- Do you need to be more collaborative with your teams and enable them to communicate effectively with each other?

Or all the above?

Integrated hybrid workplace solutions

Your bespoke solution

The MPS Team will work with you to create a bespoke solution seamlessly designed around your home working and new office infrastructure, providing an integrated and secure hybrid workplace solution, adaptable to any working environment. Your hybrid solution will provide efficiencies, improve collaboration, foster knowledge sharing, and increase productivity. All fronted by accessible, user-friendly technology.

Prime your business for the new normal

- Cloud-based applications ensure your data is secure and fully accessible in any environment
- Document management software allows documents to be shared, filed, scanned and archived securely
- eSignature technology streamlines workflow so you need not print or post signed documents
- Integrated collaboration tools enable seamless communication between home and office-based teams
- Contactless technology, digital reception desk solutions and temperature measurement kiosks
- Next-generation MPS, printer fleets transitioned from A3 MFP to A4 printers to reduce device to user ratios
- Powerful and intuitive PDF software, designed to let you create, search, edit and share PDF files with ease
- Document routing and automation, including simplified back scanning, automation of invoice processing and data extraction
- Digital mailroom automation, the mail is scanned and routed digitally to SharePoint or an individual mailbox
- Monthly subscription services for printers and laptops, saving your business time and money.

Next Steps

The MPS Team will complete a comprehensive review of your current infrastructure and discover what is preventing you from transitioning seamlessly and securely between your home and new office environments. Your integrated hybrid workplace solution will be built and implemented within the government's COVID-19 secure guidelines.

Seamless
communication

Integrated hybrid workplace solutions are agile and can flow seamlessly between home and new office environments

Providing unrivalled integration, productivity and security

The MPS Team is a leading MPS provider in the UK, a Canon Silver Partner, a HP Amplify Power Services Partner and one of only a select few Xerox Platinum Partners.
